

Many are subjects of mind control. It could be that you are amongst the victims, but how would you know if you think what you've been forced to. If you are, you may begin to break free by stepping back and watching your reactions to what you see.

The State House of Oklahoma passed a resolution that is similar to one I and others introduced to Huerfano County (see newspaper articles linked from the "save the county" section of my web site www.brucekettler.com) Oklahoma's action is significant to the people of this county. They, and other States, are standing against Federal tyranny because more people are learning that...

The U.S. Federal Government is under nearly complete control by foreign interests, who's design is to enslave and murder masses of innocent American Citizens. Being rich, or non-political, does not immunize people from this.

Now, back to the subject of mind control. What was your reaction to the above statement? If it was an automatic, and absolute certainty of "conspiracy theory" you are not thinking on your own, but are subject to mind control. It's time to free your mind, investigate, and learn the truth. I'm not asking you to believe me. You can prove the truth to yourself. The truth will set you free.

Mind control programming comes in many forms. It can be fiction which plants ideas in your subconscious. It can come from so-called "news" broadcasts on TV. There are other forms, too numerous to mention here.

Oklahoma is saying what I, and others, told the Huerfano County Commissioners 2 1/2 years ago. We told them about FEMA. Now the establishment is trying, with new legislation HR 645, to sell the American public on going into FEMA camps, that it's supposedly for their safety. There is a financial crisis, and I wrote letters to the 3 local newspapers of Huerfano County telling them about the crisis before it was publicly admitted by the establishment. The crisis was engineered by the globalists who run the U.S. Government, so they would have an excuse to enslave and murder Americans. Their plan for the people is increased crime, riots, and starvation - excuses to bring troops against them, put them in camps, and confiscate guns.

Now, here is what Oklahoma is saying::

The U.S. Federal Government in Washington DC is not legally able to enforce laws that are contrary to the U.S. Constitution. When the people of a State, such as Oklahoma, do not wish to follow unlawful mandates passed by Congress, they may refuse.

The above is simplified to make it easily understandable. The complete resolution covers more information. I have not quoted it word-for-word. Similar statements have been made by other states, and County Sheriffs have lawfully refused Federal mandates. More about that on the website.

So, what all this leads to is the danger that exists in Huerfano County, and the ways we can lessen that danger through our local government. That is outlined in the "save the county" section, and in links from it.

Write your telephone number on this page, copy it and distribute to as many people as possible. Meet in your homes. If you don't understand this or believe it fully, discuss it with others. With other people researching and discussing you can reach an understanding, find solutions, and make life safer and happier for yourselves, your families, and others in the county.
